COURSE OVERVIEW:

Caring for the dementia patient can be one of the most challenging and rewarding opportunities in health care. In this one-day seminar participants will gain knowledge of the dementia disease process, the role of the interdisciplinary team in dementia management and practical applications for treatment strategies. This course is highly interactive and participants will be able to practice their new techniques with case studies and lab sessions throughout the day.

TARGET AUDIENCE:

Physical Therapists, Physical Therapy Assistants, Occupational Therapist, Occupational Therapy Assistants, Speech Therapists, Nurses, and Social Workers.

LEARNING OBJECTIVES:

Upon completion of program participants will be able to:

- Define "dementia" and identify its causes.
- Identify methods to measure and quantify dementia and its progression.
- Understand pharmacological treatment options for managing dementia and their side effects.
- Identify, predict and avoid problem behaviors in a variety of settings.
- Demonstrate therapy and nursing interventions for the dementia patient.
- Develop documentation for IDT regarding dementia patients.

ACCREDITATION STATEMENT:
